

Date: 5<sup>th</sup> July 2024**LETTER OF RECOMMENDATION****TO WHOMSOEVER IT MAY CONCERN,**

I am writing this letter to wholeheartedly recommend Mr. Ram Ratan Aggarwal, who has recently completed an internship at Sumitomo Chemical India Ltd., Research & Development centre. This centre is approved by Department of Science and Industrial Research, India (DSIR) which is involved in process development of various agrochemicals and formulations and has a reputed name in the field of Agrochemicals. Throughout his tenure with us, Ram Ratan Aggarwal has demonstrated exceptional skills, dedication and a strong commitment towards the project.

Ram Ratan Aggarwal worked with us for 5 weeks and was trained in synthesis and analytical department.

During this period he was engaged in a project of synthesizing a molecule, its isolation and purification along with its various methods of characterization by spectroscopy and chromatographic methods.

He was also trained in the manufacturing unit, where he learned various unit operations used during the manufacturing process at Bhavnagar factory.

Right from the start of his training period, Ram Ratan Aggarwal has been eager to understand his subjects rather than merely completing the academic requirements. His endless urge to explore a subject to its depth as well as his analytical mind not only exemplifies his research ability but also testifies the fact that success is all about hard work and perseverance which finally got highlighted in his project report.

In conclusion, the intern is a young energetic student with an excellent background and great potential. I can foresee that he would make meaningful contributions in his field along with his strong footing on the fundamentals of chemical engineering which is essential for scale up of the project into real time manufacturing in the plant.

I strongly recommend him for any opportunities he may pursue, as I believe he will make a positive impact wherever his career may take him.

Thanking you,

Dr. Vandana Mhatre  
Associate General Manager (R & D)
